Game Overview

TetRize – Classic Variation   TetRize is an exciting action game. As you play, the four-part TetRize pieces fall from the top of the playing area. As they fall, you can rotate them, move them horizontally, and make them drop faster. When the pieces form a solid row of blocks across the playing area, that row vanishes. You can manipulate a piece only when it is falling. Try to make as many rows disappear as you can, and continue playing for as long as possible. The game ends when the stacked pieces reach the top of the playing area. *Scoring:* The score value increases for each falling piece and successive playing level. You can earn bonus points by removing multiple rows of blocks or picking special bonuses. 5 points for each falling piece (10 points if "Show Next Figure" option = "No") 50*'level' points for each successive playing level 500 points for special bonus "score" 100 points for one erased row 250 points for two erased rows 400 points for three erased rows 600 points for four erased rows

Color TetRize – Classic Variation This is a popular game similar to all Tetris clones, this time with colors to gather instead of lines. A three-tile column falls from the top of the screen. You can use the keyboard arrows to move the column, and the up arrow to swap the three tiles between themselves. The purpose is to form columns, rows or diagonals of at least three tiles of the same color. The more tiles are in a "column", the more points you earn. When you form a column, its tiles disappear and the other tiles can fall. *Scoring:* 5 points for each falling piece (10 points if "Show Next Figure" option = "No") 50*'level' points for each successive playing level 10*'tiles count (disappeared at once)' If tiles form another column when falling (it's usually called a "chain reaction"), you get even more points. The points are doubled when the column is in a first chain reaction. When a column is formed in a second chain reaction, the points are tripled. Etc. **Colorix TetRize – Classic Variation** This game is similar to Color TetRize, but a three-tile row falls from the top of the screen. *Scoring:* See Color TetRize scoring.

TetRize/Color TetRize/Colorix TetRize – Original Variation Rules are the same as in Classic, but game includes new bonuses. Sometimes throughout the game bonuses appeares in the playing area. You should try to touch them by falling pieces. There are two additional bonuses: "score" and "clear all". "Score" gives you 500 points, "clear all" destroys all blocks in the playing area. Also, this variation is more faster than Classic.

Options

Fullscreen Controls video mode. You can use window or fullscreen mode. Use "Alt+Enter" to switch between this modes during the game. **Video mode** Set display resolution in the game (fullscreen mode). Select lower resolution to increase the performance.
